Web Application Developer

Self-driven, result-oriented professional with a passion for working in a complete product development lifecycle of successfully launched applications. Multi-faceted skillset includes debugging distributed systems, creating REST API architecture, producing production level React components, and experience working on international Agile team.

Professional Work Experience

Renew Financial | *Web Application Developer*

Dec 2019 – Apr 2020

- Full stack web developer responsible for end-to-end web app development using JavaScript, React, Ruby, and Rails.
- Prototyped, engineered, and shipped three new features per month on average.
- Collaborated with product managers and designers to build application components that increased user accessibility and application performance.
- Refactored duplicate SASS code in multiple repositories into published NPM style library..

Daylight Studio | *Web Development Intern / QA Engineer*

May 2019 – June 2019

- Engineered backend models, routes, and services with 80% test coverage for an Express server.
- Authored over 300 integration tests for both a Vue application and a PHP web form with Cypress.js.
- Developed the dashboard view of a Vue application that relied on Vuex and D3 to create visual representations of analytics data.
- Participated in daily standups and developer meetings to discuss project status and updates with the agency team.

Oregon Health and Science University | *Research Assistant 2*

Nov 2015 – June 2018

- Oversaw the care and use of 12 non-human primates in an alcohol self-administration study to better understand the relationship between ethanol and the HPA axis.
- Provided support to a molecular genetics research project through providing surgical expertise to researchers, purifying Adenovirus, and overseeing the care and use of 7 transgenic mouse colonies.
